07:00 - 09:00 Preparation session 6 - see below

16:00 – 19:00 Workshop 7: Putting it all together

Sep 15th Departures

Preparation Sessions:

Note that leading up to the meeting you will be provided with a series of articles and resources as pre-reading for each workshop. The period between 07:00 – 09:00 each day will be spent initially reviewing the pre-reading and self-directed material after which individually or in small groups you will prepare a clinical case study relevant to the day's workshop theme. These case studies will form part of the evening workshop activity and you will be required to present. The sessions are designed to be small group and interactive and will focus on key concepts. So we are keen to encourage active participation from all our delegates. By completing the pre-reading and self directed material and preparing your case studies, you will be better able to come prepared to engage in the conversation. All sessions and workshops are mandatory.
